DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 20 is rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. The omitted steps are: step of spaying and applying, step of providing a spay tube, and step of providing an air box.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 17-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Erzinger in view of Emory.

Erzinger discloses a liquid spray unit of a processing machine for spraying onto a moving body 18 comprising: a spray tube 28 with one spray nozzle (located at the tapered end of the tube as shown in figure 5) for reciprocatingly traveling in a width direction (see figure 2). Erzinger does not disclose an air box for accelerates the spraying liquid toward the moving body. However, Emory et al. teaches a liquid spray unit having a spray tube 14 with a spray nozzle 25, an air box 26 provided with an air flow discharge port 27. Therefore, it would have been obvious to one having ordinary

skill in the art to have provided the device of Erzinger with an air box as suggested by Emory. Doing so would provide an economically way for accelerates (viscous) liquid (see column 1, lines 42-46), and because (a) the Erzinger reference and the Emory reference are *known work in one of field of endeavor*, (b) such modification is merely the use of known technique to improve a similar device by Emory and (c) such modification, i.e. choosing from a finite number of predictable solutions, is not of innovation but of ordinary skill and common sense. *KSR, International Co. v. Teleflex Inc.*, 550 U.S. (2007).

Response to Arguments

5. Applicant's arguments filed July 07, 2008 have been fully considered but they are not persuasive in view of Erzinger and Emory.
6. Applicant's arguments with respect to claims 17-20 have been considered but are moot in view of the new ground(s) of rejection.
7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
